

We take Technology Rollouts to new frontiers

## GEOGRAPHIC MARKETS

Our unique, scalable Maestro Technology Rollout System® allows us to serve customers who are geographically dispersed – whether across a country or across continents. Concert is a company with the full suite of services, partner relationships, and multi-technology experience to provide the same key benefits of speed and cost effectiveness to both our national and international customers. With our proven global capabilities, we can meet your project and performance requirements virtually anywhere.

### National Markets

Since 1995, we have rapidly deployed multi-site, multi-service, multi-technology rollouts for solution providers across multiple national site locations. For over a decade, we have been a trusted service provider to the 40,000 sites of the United States Postal Service which is comprised of one of the largest Virtual Private Networks (VPNs) in the world. This relationship and the scope of work involved demonstrate the depth and breadth of our ability to deploy technology solutions to any location across the United States. As we are fond of saying, we offer the rapid delivery of rollout services wherever there's a post office.

### International Markets

To date, Concert Technologies has performed professional work in more than 90 countries worldwide. These international locations include:

- Algeria
- Argentina
- Australia
- Bosnia
- Brazil
- Canada
- Chile
- China
- Czech Republic
- Egypt
- El Salvador
- England
- Egypt
- France
- Georgia
- Germany
- Great Britain
- Greece
- Guam
- Honduras
- Ireland
- Israel
- Italy

- Libya
- Lithuania
- Mexico
- Morocco
- Nicaragua
- Nigeria
- Pakistan
- Panama
- Serbia
- Singapore
- South Africa
- Syria
- Taiwan
- Thailand
- Over 50 Additional Countries

Accelerating the Speed of Technology Rollouts

**Different Markets. Same Service.**

Concert Technologies understands that at the core of the ability to rapidly deploy multi-site, multi-service, multi-technology rollouts is the need to have a unified, proven set of processes and methodologies in place. This is why we employ the world's first Maestro Technology Rollout System® which ensures that regardless of the location or number of sites, we get each and every project done quickly, professionally, and – most importantly – right.
