PARTNERS

Concert Techs: The Trusted Field Force of Concert Technologies

Our partner relationships include 55,000+ Concert Techs located worldwide that implement, install, and provide maintenance and support services to our customers on a local level. In the field, Concert Techs are monitored for quality and accuracy by our Project Management Team. The result: Our customers receive qualified technician service and support when and where they need it.

Concert Technologies has forged these relationships through years of dedicated, real-life technology deployments and by leveraging our unique ability to manage multiple external resources. This means a time-tested professional connection that assures rapid, qualified service across nearly any geographical location.

These relationships are also the foundation for Concert Technologies' continued expansion into the global marketplace. Recognized for its speed and quality of nationwide rollouts, Concert Technologies is utilizing established partner relationships to serve customers seeking international rollout capabilities with the same high-level of project performance, quality and reliability.

Our partnerships extend beyond our field force. We continue to establish and enrich our relationships with solution providers for the insight and value they add to our business services.

Finally, Concert Technologies partners with world-class organizations that share our mission, vision and values. Organizations, like people, prefer to buy and conduct business with those they trust. Concert Technologies is committed to strengthening the confidence of our customers by creating strong, lasting, principled relationships with all our partners.
