

CONCERT TECHNOLOGIES PRESIDENT AND FOUNDER Dennis Mazaris

Dennis Mazaris founded Concert Technologies in June of 1995. Mazaris saw well before his peers the need to overhaul and formalize through systems, processes and relationships the loose and fragmented model that typically characterized multi-site, technology rollout services.

Mazaris' development of a comprehensive project and resource management capability has enabled Concert Technologies to rapidly and successfully deploy more than 150,000 large-scale infrastructure rollouts of voice, data and video networks across diverse nationwide and global environments.

A thought leader with over 30 years of experience in the technology industry, Mazaris spends the majority of his time developing strategic plans and key relationships for the future of Concert Technologies and the way in which technology is deployed. He continues to be an integral part in Concert Technologies' pursuit of large nationwide and global deployments.

Prior to Concert Technologies, Mazaris owned and managed an Information Transport Systems company for 10 years in the metropolitan Washington D.C. area.

Mazaris has authored industry technical articles, white papers, and videos for publications, standards committees, and associations.
