

## CONCERT TECHNOLOGIES VICE PRESIDENT Tom Suder

Tom Suder is Vice President and co-founder of Concert Technologies where he oversees the sales division that is designed to support numerous civilian organizations and government agencies with their technology field rollout solutions.

Before co-founding Concert Technologies in 1995, Mr. Suder spent many years working in the Information Transport Systems industry. He brought his wealth of experience to Concert Technologies where he has been instrumental in successfully supervising and managing massive infrastructure deployment projects both globally and across the United States, particularly those associated with federal government contracts to implement FTS 2000 and FTS 2001. He is currently Concert Technologies' representative in the IP convergence planning taking place as government agencies transition from FTS 2001 to Networkx.

As a member of the Industry Advisory Council and a recipient of the honorable IAC Chair's Award, Mr. Suder assists the IAC Program Committee with his expertise in emerging technologies including IPv6, RFID and fixed wireless solutions as the IAC advises the government during the critical FTS 2001-Networkx transition period.

Additionally, Mr. Suder belongs to many professional organizations including the Building Industry Consulting Service International (BICSI) where he has served as a member of the Marketing Advisory Committee since 1997.
