FOR IMMEDIATE RELEASE

## **Concert Technologies Nationwide Technology Deployment Method Supports American Reinvestment and Recovery Act of 2009**

*Concert Technologies Nationwide Technology Rollouts Inline with US Government  
GSA Green Legislation*

**DULLES, VA, MARCH 17, 2009** – Concert Technologies Nationwide Technology Deployment Method supports the new American Reinvestment and Recovery Act of 2009. For almost 14 years, Concert Technologies has utilized the Local Multi-Service Deployment Method with the green initiative of minimizing the number of truck rolls and travel time for every site location completed.

The new American Reinvestment and Recovery Act of 2009 is largely about fuel efficiency. “There are hundreds and thousands of technology rollouts implemented every week which require field technicians to perform work at each site. This requires

at least one vehicle per site and could potentially include a great deal of travel time,” said Dennis Mazaris, Concert Technologies President and Founder. “The easiest way to support the fuel-efficiency initiative is to minimize the number of truck rolls and use local contractors within close proximity of each site to perform the work. Our Local Multi-Service Deployment Method does just that.”

### **Green Benefits of the Local Multi-Service Deployment Method**

- Minimized truck rolls to each site reduces fuel used per job location
- Utilizing local onsite technicians cuts travel time and lowers carbon footprint
- Monitoring each technician at every site provides quality assurance of site work and decreases fuel used by limiting the number of potential vehicle revisits

Concert Technologies recently released an industry-first white paper that examines the available Technology Deployment Methods used in the industry today. For a free copy, visit [www.concerttech.com/White-Paper.htm](http://www.concerttech.com/White-Paper.htm)

### **About GSA and the American Reinvestment and Recovery Act of 2009**

The American Reinvestment and Recovery Act legislation includes \$300 million for fuel-efficient vehicles. A large part of that initiative will be handled by GSA. In addition to other goals, GSA plans to create jobs with the new funds and thereby stimulate the economy.

### **About Concert Technologies**

Concert Technologies, founded in 1995, is a privately-held technology service company based in Dulles, VA. It is the leader in the rapid delivery of nationwide rollouts and global technology deployments for government, commercial and international organizations. Utilizing the Maestro Technology Rollout System, it

quickly implements, installs and manages multi-site, multi-service, multi-technology infrastructure projects. Visit Concert Technologies online: [www.concerttech.com](http://www.concerttech.com)
