FOR IMMEDIATE RELEASE

## **Concert Technologies Awarded Technology Rollout Project by LGS Innovations**

*Concert Technologies employs its Maestro Technology Rollout System to orchestrate project success for top telecommunications company*

**DULLES, VA, JANUARY 14, 2009** – Concert Technologies today announced the award of its technology rollout project by LGS Innovations. This is one in a series of high profile awards for Concert Technologies by top nationwide and global telecommunications companies seeking nationwide rollout services.

A select team of Bell Labs researchers, LGS is a subsidiary of the North American operations of Alcatel-Lucent, which is the global leader of telecommunications and networking products and services.

“It is a great opportunity to have partnered with LGS Innovations for this project,” said Tom Suder, Vice President and co-founder of Concert Technologies. “They are committed to the delivery of reliable, secure technology and we are pleased we could help them achieve their goals.”

### **Multi-site Nationwide Technology Rollout Requirements**

Since 1995, Concert Technologies has understood that nationwide technology rollouts take a defined process structure, unified rollout services model, experienced internal resources and a broad network of established partnerships.

“In order for us to provide multi-site nationwide technology rollout services to top partners such as LGS Innovations, we have to deploy technology efficiently and quickly,” said Suder. “That takes a system of processes and methodologies that exceeds those offered by traditional technology rollout companies. That’s where our Maestro Technology Rollout System comes in.”

### **About Concert Technologies**

Concert Technologies, founded in 1995, is a privately-held technology service company based in Dulles, VA. It is the leader in the rapid delivery of nationwide rollouts and global technology deployments for government, commercial and international organizations. Utilizing the Maestro Technology Rollout System, it quickly implements, installs and manages multi-site, multi-service, multi-technology infrastructure projects.
