FOR IMMEDIATE RELEASE

Concert Technologies Offers Ground-breaking Nationwide and International Rollout Seminar Series to Technology Industry

Concert Technologies' "Prevent Nationwide & International Technology Rollout Disasters" Seminar Series Provides Cost-savings, Accelerated Deadline and Minimized Management Effort Solutions to Tough Industry Problems

DULLES, VA, MAY 29, 2009 – Concert Technologies today announced its technology rollout seminar series entitled *Prevent Nationwide & International Technology Rollout Disasters*. This series is an expansion of Concert Technologies' seminar presentation, *Four Critical Guidelines for Avoiding Landmines of Working with Nationwide, Multi-site Technology Rollout Companies*, which was presented earlier this month at the 2009 BICSI Spring Conference & Exhibition in Baltimore, MD.

About the Seminar Series

For the first time ever, the *Prevent Nationwide & International Technology Rollout Disasters* seminar series explains the problems plaguing the technology rollout industry on both national and international levels. This includes economic and technology issues that are continuing to grow at an accelerated pace. The series also explains how to solve these problems and ensure that every technology rollout is as successful as possible. This includes from a cost, timeframe and management effort perspective.

“There are just too many firms that are ill equipped to take on the challenges presented on a nationwide basis. This is compounded drastically with international rollouts with items such as shipping, customs and local resource support across countries,” said Dennis Mazaris, President and Founder of Concert Technologies. “We want to help educate the industry and that means getting the word out. The response we received at BICSI was overwhelming. So we know that awareness of the problems and answers in the technology rollout industry provides great benefit to both decision makers and influencers at the end user, solution provider and contractor levels.”

Expanding Opportunities

Concert Technologies plans to present this information at other conferences and association meetings in the future. “The BICSI Conference in May was just the beginning,” said Mazaris. “We are extending an open invitation to any organization or association that would like to learn more about mitigating your risks and making your nationwide and/or international technology rollouts as efficient and cost-effective as possible.”

About Concert Technologies

Concert Technologies, founded in 1995, is a privately-held technology service company based in Dulles, VA. It is the leader in the rapid delivery of nationwide rollouts and international technology deployments for government, commercial and international organizations. Utilizing the Maestro Technology Rollout System of methodologies, which quickly implements, installs and manages multi-site, multi-service, multi-technology infrastructure projects.
