# BICSI Establishes First Authorized Design Training Provider in the Mid-Atlantic Region at Concert Technologies

**DULLES, VA, May 27, 2015**– Concert Technologies has been awarded the status of BICSI Authorized Design Training Provider by BICSI, the professional association supporting the information and communications technology (ICT) industry.

As a BICSI Authorized Design Training Partner, Concert Technologies is a recognized provider of BICSI's ICT design and project management training. With only 6 ADTPs nationwide, Concert Technologies will provide BICSI-authorized trainers in a classroom environment to offer the BICSI PM 110 course. Upon the completion of this course, individuals will be well prepared to take the Registered Telecommunications Project Manager (RTPM) exam at a nearby testing center.

"As an added bonus to the PM 110 curriculum, our training center is located in the same facility as our global technology rollout operations center, allowing our students an inside look at the management of technology infrastructure projects," said Dennis Mazaris, President and CEO of Concert Technologies. "To offer this training program is in alignment with our dedication to continuing education and career advancement in the industry."

Concert Technologies has released a video about the BICSI PM110 course and the benefits of the BICSI RTPM credential. To view the video and learn more about the BICSI PM110 course and becoming a BICSI-credentialed RTPM, visit Concert Technologies' website.

**About BICSI**

BICSI is a professional association, which provides information, education and knowledge assessment for individuals and companies in the information and communications technology (ICT) industry. BICSI serves more than 23,000 ICT professionals, including designers, installers and technicians. These individuals provide the fundamental infrastructure for telecommunications, audio/video, life safety and automation systems. Through courses, conferences, publications and professional registration programs, BICSI staff and volunteers assist ICT professionals in delivering critical products and services, and offer opportunities for continual improvement and enhanced professional stature. Headquartered in Tampa, Florida, USA, BICSI membership spans nearly 100 countries. www.bicsi.org

## About Concert Technologies

Founded in 1995, Concert Technologies is a privately-held technology rollout company based in Dulles, VA.
