DEMARC EXTENSION NATIONWIDE

This specialized program is your source for demarc extensions, including facility cabling, circuit validation, testing, and maintenance. By specializing in demarc extensions and eCPE & equipment services, we are able to minimize the number of truck rolls required to complete customer projects, accelerating deployment timeframes and reducing overall project costs.

RISERSAFE ° TECH READY BUILDINGS

riserSAFE is designed to make maintaining, updating and securing Commercial Real Estate (CRE) connectivity easy. Our Tech Ready Building program is built on more than two decades experience planning and delivering technology services in premium commercial and government buildings nationwide.

GLOBAL DATA CENTER SERVICES

Whether you are consolidating data centers, cleaning up cabinets, or maintaining the physical infrastructure at your data center, it is essential to find a trusted partner to support your requirements. Concert Technologies is a global leader in data center services: planning, managing, and providing the skilled local resources to work with your team and support your data center requirements.

VIRTUAL PROJECT MANAGEMENT

Studies show that only 1 in 5 top-line consultancy hires are described as "unequivocal successes." Our Virtual Project Management Program is designed to give the C-Suite the opportunity to work hand-in-hand with experienced Project Managers to strategically develop standardized processes and reduce operating expenses and capital expenditures for their enterprise rollout projects.
